

***Helping major production industries achieve operational excellence.***

**Who we are:** MIPAC is a leading provider of process control, instrumentation and electrical engineering solutions for industries which require complex, business-critical continuous control systems. We were founded in 1997 and are headquartered in Brisbane, Australia. The company is privately owned and shareholders are also directors. We currently employ more than 50 talented, experienced engineers.

**Services and solutions:** From concept to commissioning, MIPAC provides an advanced suite of audit, measurement, design, control and process improvement engineering services and relevant, innovative technology.

**Our clients:** Our engineers have played a key role in the success of more than 200 projects worldwide, in industries such as mineral processing, metal production, oil and gas, food and beverage, and pulp and paper. Some projects have a total value of more than \$1.5 billion.

We have recently worked on projects for:

- Aditya Birla, Australia
- Xstrata Copper, Australia
- Xstrata Zinc, Australia
- Xstrata Technology
- BHP Billiton, Australia
- Kazzinc, Kazakhstan
- QER, Australia
- Newcrest Mining
- Straits Resources
- China Yunnan Metallurgical Group, China
- Sterlite Industries, India
- Southern Copper, Peru
- Mopani Copper, Zambia.

**Long-term growth:** MIPAC has grown significantly in recent times and its prospects continue to be very positive. We are successful because we:

- focus on developing new business in key growth markets
- invest in research and development of new technologies
- sustain and grow our client base by understanding their needs, delivering high-quality solutions and ensuring satisfaction, and
- invest in, retain and foster our talented employees.

**Awards:** Winner, 2009 PACE Zenith Award for Technical excellence in Metal Products category for CellView®; finalist for Advanced Control work with Xstrata Zinc; winner and runner-up in 2006 and 2008.
